

Master Development Plans

- What is a Master Development Plan (MDP)?
 - Previously called Plan of Development (POD).
 - A document that describes plans for multi-well development.

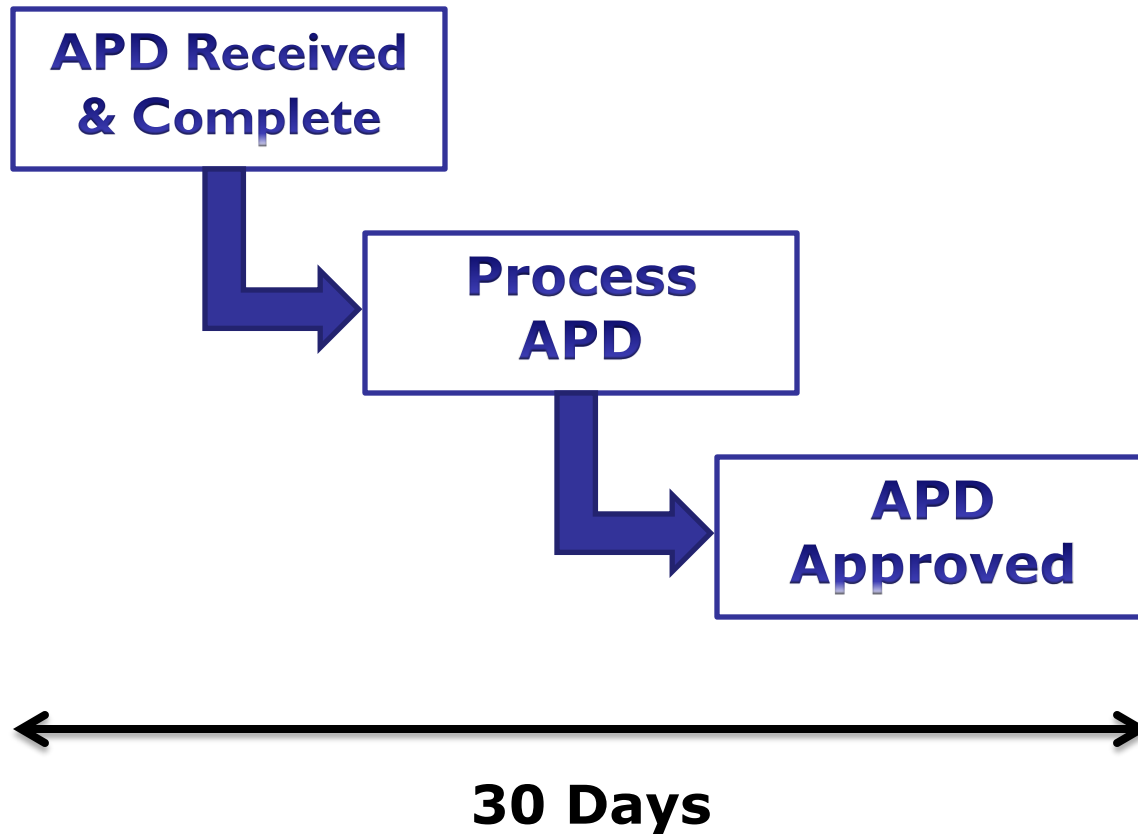

Typical APD Time Restraints

- BLM strives to get APD's processed and approved within 30 days.
- The following obstacles make this goal challenging:

Process	Typical Time to Complete
Consultation with USFWS	30 days
Preparation of NEPA Document	30-90 days
Emissions Inventory	Unknown

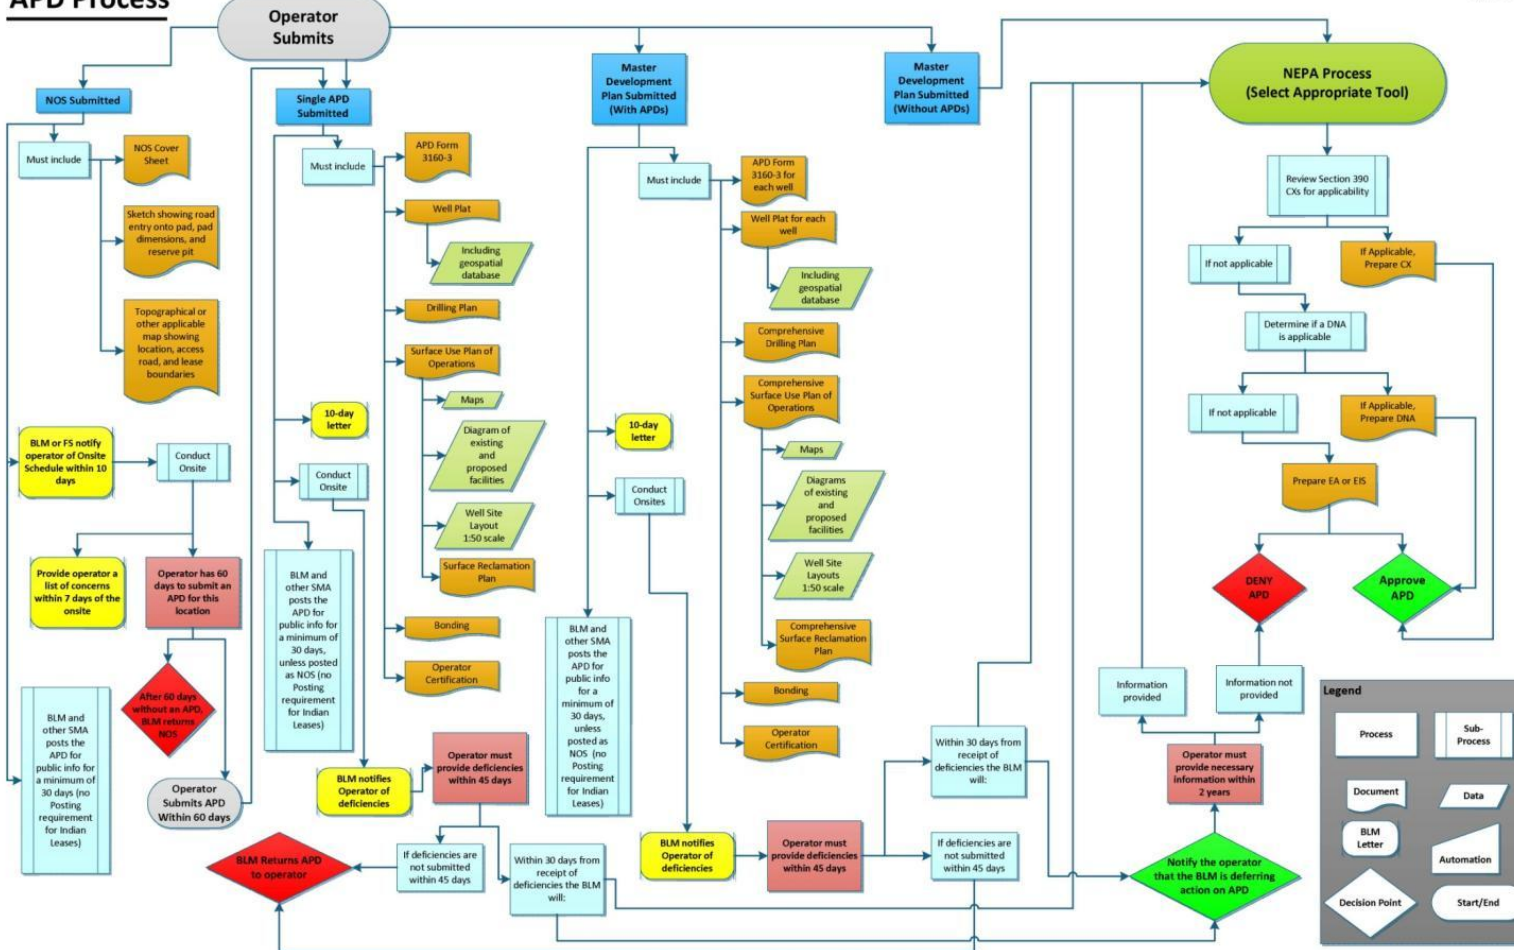

The Concept

Reality

APD Process

April 17, 2012

The Solution – Master Development Plans

- Consolidates multiple wells into a single process:
 - One NEPA document.
 - One Consultation Letter to the USFWS.
 - One Emissions Inventory.
- After an MDP is approved, future APD's within the parameters of the MDP can be approved MUCH quicker.

Master Development Plan Components

- Geographically related APD's are combined into a single proposal document.
- A single Surface use Plan and Drilling Plan are prepared for all wells within the plan.
- A single coordinated onsite exam can be conducted for all proposed wells.
- A single NEPA Decision is issued.

Things You Can Do With All The Extra Time And Money MDP's Will Save You
